PROJECTS

E-Commerce Platform with Product Display and Frontend Payment Integration

Nov 2024 – Current

Tools: React JS, Tailwind CSS

A comprehensive e-commerce platform that enables users to browse products, manage shopping carts, and complete the checkout process with frontend integration of payment gateways.

Responsibilities:

- **Frontend Development:** Developed a dynamic, responsive user interface using React JS and Tailwind CSS, ensuring a seamless shopping experience across various devices.
- **Product Display:** Implemented features to display products dynamically with React, enhancing user interaction with product details and categories.
- **Checkout Process:** Integrated frontend payment gateway options (Razorpay, Stripe) to handle payment processing, providing users with a smooth checkout experience.
- **Data Management:** Worked on the frontend to display and manage data related to products and user carts.

Real Estate website with Contact Form Integration

Aug 2024 – Oct 2024

Tools: React JS, Tailwind CSS

A responsive real estate website designed to showcase properties, enable user inquiries through a functional contact form, and enhance user engagement with animations.

Responsibilities:

- **Frontend Development:** Designed and developed a responsive user interface using React JS and Tailwind CSS, ensuring seamless navigation across devices.
- **Contact Form Integration:** Implemented a functional contact form for users to send inquiries directly to the admin via email.

CERTIFICATES
